Office Action Summary	Application No. 10/711,215	Applicant(s) CHUANG ET AL.	
	Examiner Phuoc Tran	Art Unit 2624	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2624

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishikawa et al [2003/0067627].

As to claim 8, Ishikawa et al disclose a method for image processing, the method comprising: receiving a plurality of code units (see paragraphs [0239] – [0241]); and receiving range of display information and choosing a portion of the plurality of code units according to the range of display information (see paragraphs [0243] – [0245]).

As to claim 9, Ishikawa et al disclose that the code units are a plurality of minimum code units [see Figs. 39, 3, 5].

As to claim 10, Ishikawa et al disclose that the information about the range of display is output from a central processing unit (CPU) (see paragraph [0236]).

As to claim 11, Ishikawa et al disclose that the CPU determines the range of display according to a user setting (see paragraphs [0236], [0243] – [0245]).

As to claim 12, Ishikawa et al disclose performing a resizing operation on the portion of the plurality of code units (see paragraphs [0291]).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2624

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ishikawa et al [2003/0067627] in view of Krishnamachari [6,546,155].

Ishikawa et al do not disclose a rotation operation. Krishnamachari teaches a rotation operation (see Figure 4). It would have been obvious to one of ordinary skill in the art to use a rotation operation taught by Krishnamachari in Ishikawa et al for the purpose of rotating an image.

6. Claims 1-7 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc Tran whose telephone number is (571) 272-7399. The examiner can normally be reached on MON-FRI.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen D. Lillis can be reached on (571) 272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
